

ACCT 7740 Issues in Financial Accounting and Corporate Governance (3,3,0)

This course aims to help PhD and MPhil students to develop their abilities to understand and conduct empirical financial accounting and corporate governance research on the following issues: (1) the role of accounting information in security valuation; (2) the accounting choices made by managers; and (3) the role of internal and external corporate governance constituents for firm valuation and performance.

The papers we will discuss are selected to illustrate the strands of empirical accounting research and their historical trends. We will use these papers to discuss and critique the motivation for empirical research, the connection between theory and empirical work, the research designs, and the methods of analysis employed. The topics of interest include: the relationship between accounting information and stock prices, the relationship between accounting information and various types of contracts in modern organizations, earnings management behavior of corporate managers, the implications of corporate governance, accounting disclosures, international accounting differences, China accounting, and contemporary accounting thoughts and theories.

ACCT 7750 Required Readings in Accounting Research (3,3,0)

This course aims to (1) provide a tailor-made and guided reading program for research postgraduate students in specific area(s) of accounting, and (2) induce students to acquire in-depth understanding of their specific research field in the discipline of accounting. The supervisor and the student are required to work out a reading list to cover literature supplementary to the student's research area. The approved list will be submitted to the Department for record.
