VART 2116 Painting: Image and Interpretation (3,4,0) (E) Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

This course aims to introduce students to the full range of materials and processes of painting. It provides opportunities for substantial skill development through extensive studio practice of different genres including portrait, landscape, still life and abstraction. The course also consolidates the technical expertise in painting including the understanding of the material quality of paint, the consideration of different painting supports, health and safety issues as well as the efficiency of studio practice.

The course also puts emphasis on examining how ideas and images are represented and explore how they relate to individual expression as well as social interpretation. Students will have opportunity to investigate the fundamental formal languages of painting through different exercises and will gain a solid understanding of the connection between form and content. Studio practice will be supported by lectures and tutorials, which purpose to investigate the debates surrounding the role of contemporary painting. Regular class discussions will also be held to examine the work of art by contemporary painters in terms of their cultural context and stylistic concern. At the end of the course, students will be equipped with preparation skills to discuss in oral and written forms the conceptual and visual elements in their paintings.

VART 2125 Visual Literacy in Chinese (3,4,0) (E) Painting

Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

This course provides comprehensive and fundamental training on guohua, literally translated as "national painting" or "Chinese painting". It is primarily divided into two sections: (1) understanding of *Xieyi* (free style); and (2) understanding of *Gongbi* (fine-brush, or delicate style). Focuses are on the critical concepts and ideas, conventional modes of expression and technical skills of *guohua* in the ancient models. Students are expected to explore such models for reinterpreting and rejuvenating the traditional form of *guohua* in the end of the semester.

The rationale to offer this level-II course is to allow students to understand one of the cores of Chinese arts—Chinese painting. Regarded as Hong Kong residents, art students are supposed to have sufficient art trainings in both Western and Chinese arts. However, Chinese art training has been in deficit in local educational system even after the handover of 1997. Thus this course is to provide relevant art trainings and cognitive knowledge for students to capture the Chinese cultural narratives through practicing Chinese painting.

While English is the major medium of instruction of this course, occasionally Chinese will be used in the teaching of materials and texts related to Chinese arts.

VART 2126 Chinese Word as Image: (3,4,0) (E) Foundational Studies in Chinese Calligraphy and Seal Engraving

Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

The centrality of using Chinese words as the major element in artistic expressions is a unique and prominent phenomenon in both Chinese and global visual culture from past to present. Chinese words, as evolved from pictographic representation to non-representational character, is the fundamental medium for artistic expressions in the practices of a range of Chinese art forms including calligraphy, seal engraving and other craft arts. Whether brushed on paper or engraved in three-dimensional objects made of stone, bronze and any other penetrable material, the visual and artistic form of Chinese word interacts with the subtlety of the linguistic aspect of Chinese language to produce a richly interdisciplinary artistic experience. This course consists of three parts: (1) The study of foundational knowledge and theories pertinent to the material, tools, and the linguistic skills involved in the practices of Chinese calligraphy and seal engraving; (2) The practical study of brush, engraving and carving techniques, the compositional strategies of the strokes of Chinese characters and other relevant basic skills; and (3) A simple hands-on studio art project. The class will learn the skills of adopting different material, handling of tools and other basic techniques of Chinese calligraphy and seal engraving through demonstrations and guided practice. The course culminates in a small-scale yet rewarding creative project where by students will produce one piece of artwork based on the application of their acquired concepts, tools and skills. Students need to the foundational tools and skills of this course to nurture their understanding of Chinese cultural heritage. The acquire foundational knowledge and experience offered by this course are intended to cultivate a synergy with all other courses of Chinese and Asian art history, visual culture, Chinese calligraphy, seal engraving, Chinese painting, typography, Chinese language, and some aspects of sculpture.

VART 2135 Looking through the Lens (3,4,0) (E) Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

The world and its cultures are external before one looks deeply. As artists and as responsible citizens, ways of focused looking will help us to learn from, and benefit back to our society and the world.

This is a course on fundamental knowledge of lens-based media, including photography and moving image productions. The essential foundations provided in this course are not merely technical craft but ways of inquisitive looking. Looking is attentive and active while seeing is external and passive. Accordingly, supplementary to technical training, this course aims at broadening students' visual perceptions and sharpening their senses responding to the outside world.

Students will explore and experiment how photographers, moving image artists understand, capture and represent actuality. Technical workshops on camera obscura, optical theory, colour correction, framing and composition, camera operation and camera movement will be offered. Field work of self-directed nature for practicing skills of observation is an important part of the course. Class assignments will enhance students' ability to look into details both in aesthetic realm and in cultural contexts.

Students will be working mainly on photography and elementary moving image production that are essential craft for media artists in various fields and in a cross-disciplinary manner. This course serves as a foundation for works of photography and moving image, interactive media with moving and still content and visual narrative. Students will be both technically and intellectually ready to engage in further experimentations of lens-based media creations in advanced courses.

VART 2136 Sound: The Basics (3,4,0) (E)

Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

This course aims to study sound beyond the common practice of audio as supplementary and secondary to visuals. Students will un-learn sense of sight as their primary sense, and thus relearn multiple meanings and interpretations of sound and its relations with visuals. Students will learn to use microphones and recorders, and the skills of audio recording and editing techniques. On top of these technical craft, fundamentals of sound design form essential parts of the course. Principles of sound including physics of sound, auditory perception, awareness of acoustic environment and different types of listening practices will also be introduced.

As a foundation course, it aims to raise students' interests and doubts in rethinking audio-visual relations. By stressing sound as an artistic and expressive medium in its own right, rather than approached as secondary to visuals, students learn to discover immense creative potentials of sound. Hence, students will be both technically and intellectually ready to engage in further experimentations of sonic creations in advanced courses exploring novelty and possibilities of time-based media. Students will work on sonic creations or, sound design for moving image works (of their own or of their fellow classmates). This course also supports students further explore sound in various media such as video art, installation art, hypermedia, interactive media.

Sculpture: Materials and Processes (3,4,0) (E) VART 2145 Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by

AVA or any Visual Arts courses

We live in a built environment. This environment is defined by different structures and objects, and their spatial relationships. In an effort to interpret our environment and to create new places and forms, this course will explore through in and out of class projects how structures and forms are built through an additive process. This course is designed to bring to light different ways of understanding how sculpture has been made, can be made and explore new methods for the continuance of the discipline into a contemporary context. This course not only looks at sculpture as an independent form but sculpture as an expanded discipline that reaches into many realms expanding our perception to three dimensional space and experience.

This course explores the tools and techniques of additive production and the capacities of the wood shop, metal shop and sculpture studio. A series of small projects designed to build students' skill base in carpentry, metalworking and general structural challenges will be considered and applied. In addition, students are invited to incorporate projects from other AVA courses or their individual studio practice into the course.

VART 2147 Installation Art (3,4,0) (E) Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

Installation has been the most commonly used art form in contemporary visual creation since 1970s. It is a kind of integrated medium of expression which potentially triggers different sense such as sound, light, odour and other intangible sensible elements. The phenomenon of mixed media and interdisciplinary creation in contemporary art making has indicated strong initiatives to explore new creative space and language within an existing framework, and installation art is the most organic experimental area in this realm. Through the practice of installation art, students will utilise various forms of visual expression within space.

This course aims to inspire and enhance students' abilities in creativity and expression through practice, exploration and research work on various mixed-forms in the concept of space and place. It will focus on exploring the integrated specificity of installation art, which can integrate other medium such as video, imaging, processing, temporary, performance and theatre, and even interactive installation. It will give a general survey on theory, the development and the latest trends of installation art; students will explore how ideas and theories get contextualized, and how space is redefined with concepts of identification and site-specific contextual meanings. Construction workshop will be given to assist their installation production.

VART 2155 Bodyscape (3,4,0) (E)

Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

In most all art forms, the artist is either moving away from the human form or closer to it. This fluctuation defines the need for further exploration of the body's ability to communicate and produce form that can further define artistic expression.

This course will explore the body as a landscape for appropriation. Students will look at the different techniques involved in using the human form as object and subject of their creative output. Students are to identify the human forms' innate ability to be abstracted and appropriated for self-expression. Students will

explore the body in different mediums and processes from traditional to contemporary. There will be a focus on the connections that can be made between the generation of form, the creative process and the body as a performative object.

VART 2156 Interactive Art

Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

Contemporary artists have been experimenting with the use of technology to enable and orchestrate the participation of the audience. Unfortunately, common studies of interactivity are often focused on the technical implementation rather from the critical and aesthetic viewpoints.

This course introduces the foundation concepts and skills of interactivity employed in contemporary art and design. It aims to go beyond the traditional discussion of interactive media from either the media studies approach or the cognitive aspect of the human computer interaction (HCI) direction. Within the current social and technological context, it provides a broader investigation from the participatory and the performative nature of interaction with the focus of the human body as the main site of interaction.

Students in the course learn to create simple audio-visual musical instruments that the artists and audience can perform together. They also build game-like environments or devices that participants can explore through their bodily interaction. Within this context the focus of the course lies more on the interaction process and experience rather than on the interface design.

This course provides a broad coverage of the use of interactivity in different areas of contemporary art and design. Historical reference will be drawn from a variety of sources such as literature, theatre, information technology, social science, and architecture. The course will teach the use of the simple graphical programming environment Pure Data that the students can use to experiment with interactive media content, without going through a steep learning curve of mastering traditional text based programming.

VART 2215 Typography

(3,4,0) (E) Prerequisite: VART 1006 Introduction to Visual Arts II/Visual Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

Typography means selection, scaling and organizing letters on a blank page or screen. It is one of the graphic designer's most basic challenges. Typography is the tool to communicate any kind of content. Based on the students' prerequisite knowledge and experience in design, they will further broaden their understanding of micro and macro typography, developing and using grids in typography, preparing data for the print process and using the PDF-format for publishing content online. Additionally, through lectures, plus research and practice students will strengthen their expertise in design history, and study the work of prominent designers in the field of graphic design.

Typography addresses issues that are useful for all disciplines of Visual Arts-ranging from design practices to fine arts. However, its principles are especially useful for Information Aesthetics, Book Design and Exhibition Design.

VART 2216 **Graphics Storytelling** (3,4,0) (E) Prerequisite: VART 1006 Introduction to Visual Arts II/Visual

Arts Practice II or any GDCV courses offered by AVA or any Visual Arts courses

"To be a person is to have a story to tell."-Isak Dinesen

Storytelling is a fundamental element in many creative processes; comic art is a medium that best illustrates its importance through arrangement of visual elements and image-text interactions. This course aims to provide a platform for the students to specifically look into the aesthetics of storytelling. It emphasizes on both the training of practical skills and the investigation of the language of comic and sequential illustrations.

Through the introduction of theories by scholars and artists like Scott McCloud and Will Eisner, and the examination of the recent
