BMS 2580 Reproductive System (2,2,0)
The reproductive system is an essential system of the body. It not only is responsible for the procreation of the species, but also responsible for the hormonal control of the sexual characteristic of the individual. Derangement in this system can cause debilitating diseases of the body.

BMS 2610 Immunology and Rheumatology (2,2,0)
Rheumatology is the study of rheumatic diseases (i.e. diseases of the connective tissues, muscles, bones and joints of the body), which affect people of all ages and constitute a big medical issue. Recent advances in immunology closely relate the pathogenesis of rheumatological disorders to the immune system. The immune system is responsible for the defense mechanism of the body. It helps the body to fight invading pathogens, destroy altered and cancerous cells and clear up old and dying cells. Malfunction of the immune system will cause a number of diseases. Autoimmunity causes most of the connective tissue diseases of the body. It is the objective of this course to give the students an overview of the immune system and some of the diseases caused by dysfunction of this system, including rheumatological disorders.

BMS 2620 Nervous System (2,2,0)
The nervous system is responsible for perception of the external environment, an individual’s behavior in it, and maintenance of the body’s internal environment in readiness for this behavior. Disorders of the nervous system are responsible for a significant percentage of acute medical admissions and are also responsible for a large proportion of chronic physical disability.

BMS 2630 Surgery and Emergency Medicine (4,4,0)
Surgery is a discipline of medicine that treats diseases, injuries, and deformities by manual or operative methods. The objective of this course is to provide the CM students with basic vocabulary, general knowledge, and surgical principles rather than operational technical details. Students are expected to know basic knowledge about surgery and surgical patients, how to treat minor wounds, burns, fractures and other minor injuries.

Emergency medicine is a branch of medicine that deals with evaluation and initial treatment of medical conditions caused by trauma or sudden illness. It is a relatively new discipline and may involve different branches of medicine. It is important that students have a general view of various emergency conditions commonly encountered in clinical practice, their clinical features, diagnosis, investigations and the initial emergency management.

BMS 3190 Medical Statistics (2,2,0)
The logic of statistical thinking is a very important element in medical education. Intelligent use of facts and figures is nowadays an essential part of the training for a doctor. This course furnishes students with statistical concepts and ideas which are useful in medicine. Students’ understanding will be fostered through computer experiments in a computer laboratory.

BMS 3581-2 Honours Project I & II (3,0,*)
Under the supervision of project supervisor(s), final year students are required to carry out an independent research on a topic in the areas of Chinese medicine and basic biomedical science. The research project provides students with the opportunities to extend knowledge and establish a solid foundation for the development of future research planning and reporting skills.

BUS 1190 Mathematics for Business (2,2,0)
This course is designed to provide business students with essential knowledge of mathematical techniques commonly used in business world today. Particular attention is given to teach students how to apply these techniques such as calculus, linear algebra and probability in solving business/management problems. This course also introduces students the concept of the time value of money and helps them to understand the importance of calculating present and future values to corporations.

BUS 1200 Statistics for Business (2,2,0)
In today’s management decision making process, one of the useful and commonly employed tools is statistical analysis. This course provides business students with the basic knowledge in understanding and skills in performing these statistical techniques like sampling methods, interval estimation, hypothesis testing, analysis of variance and regression analysis. Nonparametric methods are also covered so as to allow students to have a broad understanding of different statistical testing methods. Applications of these techniques in the business environment will be emphasized in the course.

BUS 1230 Chinese Wisdom and Contemporary Business Management (3,3,0)
Ancient Chinese Wisdom and Contemporary Business Management

BUS 1240 Business and Corporate Social Responsibility (3,3,0)
The course provides an overview of the primary business disciplines and the basic concepts of corporate social responsibility. Topics include human values and ethics in the workplace, multiculturalism, corporate social responsibilities, business functions, and general principles of effective business operations.

BUS 1630 The World of Business (3,3,0)
This course provides an introduction to the range of business skills and functions and examines how these skills and functions are useful in both profit-making and non-profit-making organizations. This course also explores the importance of business organization to contemporary Hong Kong society. It aims to investigate how business organizations contribute and respond to a variety of contemporary challenges ranging from environmental and workplace dealings to issues of maintaining competitiveness in an increasingly global economy. This course is offered to non-BBA students only.

BUS 1640 Law in Hong Kong (3,3,0)
The course offers a new and interesting way of learning about Hong Kong laws. There is no text book and the course is based entirely on discussion on Hong Kong cases selected and presented by the students on their research on the Web and library. Therefore each session will be unique as the topic and content are decided by the students. After attending this course, the students will learn how to do legal research to find out the law. This course is offered to non-BBA students only.

BUS 2110 Operations Management (3,3,0)
Prerequisite: BUS 1240 Business and Corporate Social Responsibility or BUS 1630 The World of Business
The course deals with the fundamental concepts of business operations management as they pertain to the service and manufacturing industries. Students will learn the fundamental concepts and applications of operations management through problem solving and case studies. The course will focus on the extent of applications of operations principles learned in the classroom setting to contemporary business operations management problems.
