

COMP 3035 Health Information Technology (3,3,0) (E)

Prerequisite: Year III or above standing in Computer Science, and Computing and Information Systems

This course is designed to better equip computer science students for building their career in healthcare sector. After completion of this course, students will learn the structures, operations and workflow in healthcare organizations. Students are able to describe the data involved and data standards in the healthcare industry. Moreover, students can explain how IT can support and improve the healthcare systems.

COMP 3040 Internet and the World Wide Web (3,2,1) (E)

Prerequisite: COMP 2330 Data Communications and Networking

Students will learn the principles of the Internet and the World Wide Web, study some real-world Internet systems and applications, and learn some current topics.

COMP 3045 Advanced Algorithm Design, Analysis and Implementation (3,2,2) (E)

Prerequisite: COMP 2007 Object Oriented Programming, COMP 2015 Data Structures and Algorithms

This course aims to help students develop advanced algorithm design and analysis skills as well as efficient programming techniques for solving a variety of challenging problems. The course has three major components: (1) theory of computation: automata, language theory, and computational complexity; (2) advanced programming techniques: collections, generic programming, and Java threads; and (3) problem solving: a variety of algorithms for real challenging problems.

COMP 3050 Distributed Computing Systems (3,3,0) (E)

Prerequisite: COMP 2330 Data Communications and Networking

This course introduces the needs, key concepts, and techniques underlying the design and engineering of distributed computing systems. The discussion will be emphasis on communications, synchronization and concurrency control, process management, distributed file services, and case studies. Also included is an introduction to clustering computing and parallel algorithms.

COMP 3060 Digital Media Computing (3,2,2) (E)

Prerequisite: COMP 1210 Data Structures and Algorithms and MATH 1140 Computational Mathematics

This course introduces basic properties of different types of digital media, namely audio, image and video in multimedia systems. As data compression is the most important enabling technology that makes modern multimedia systems possible, data compression algorithms and the international standards of these digital media will be discussed.

COMP 3070 Digital Media Communications (3,2,1) (E)

Prerequisite: COMP 3060 Digital Media Computing

Students will learn the principles of digital media communications, study some multimedia communication systems, and learn some current topics.

COMP 3080 Computer Graphics (3,2,2) (E)

Prerequisite: COMP 1210 Data Structures and Algorithms and MATH 1140 Computational Mathematics

Students will learn the essential mathematical foundation and algorithms for creating computer graphics, and the methods of implementing these algorithms. Students will also gain practical experience on these topics by using graphics application programming interface (API).

COMP 3090 Introduction to Web Intelligence (3,3,0) (E)

Prerequisite: COMP 1180 Structured Programming and COMP 2330 Data Communications and Networking

This course introduces the fundamental concepts as well as practical applications of contemporary artificial intelligence (e.g. incorporating knowledge discovery and data mining, intelligent agents, and social network intelligence) and advanced information

technology (e.g. involving wireless networks, ubiquitous devices, social networks, and data/knowledge grids) in the context of Web-empowered systems, environments, and activities. In addition, it discusses the techniques and issues central to the development of Web Intelligence (WI) computing systems.

COMP 3110 Data Mining and Knowledge Discovery (3,2,1) (E)

Prerequisite: COMP 1160 Database Management, COMP 1210 Data Structures and Algorithms, and STAT 1210 Probability and Statistics

This course is aimed at providing an overview of concepts and techniques in knowledge discovery and data mining. Relevant applications in specific domains such as medicine and health care will be covered.

COMP 3120 Intelligent Systems (3,3,0) (E)

Prerequisite: COMP 1180 Structured Programming and Year III standing

This course is aimed at providing an overview of the state-of-the-art computational models and techniques for developing intelligent information systems, software solutions, and human-computer interfaces. Some practical applications in such areas as Web Intelligence, Business Intelligence and Personalized Assistance will be introduced. Related implementation issues will be discussed.

COMP 3130 Information Retrieval and Search Engine (3,2,1) (E)

Prerequisite: COMP 1160 Database Management, COMP 1210 Data Structures and Algorithms and STAT 1210 Probability and Statistics

This course introduces the basic principles of information retrieval and search engine. Advanced models and techniques in information processing and retrieval will be covered.

COMP 3140 Computer and Network Security (3,3,0) (E)

Prerequisite: COMP 1180 Structured Programming, COMP 2330 Data Communications and Networking, and Year III standing

This course introduces the fundamental concepts and techniques in computer and network security. Topics include basic encryption techniques, cryptographic algorithms, authentication and digital signature, public key infrastructure, access control, security models, as well as their applications to, for example, IP security, Web security, and trusted operating systems. In addition, it discusses other system and programming related security issues, including non-malicious errors, computer virus, and intrusion detection.

COMP 3150 E-Technology Architectures, Tools and Applications (3,2,1) (E)

Prerequisite: COMP 2330 Data Communications and Networking and Year III standing

This course will develop students' understanding of recent developments in e-technologies including XML, Web services, service-oriented architecture, Web-enabled business processes as well as related architectures, tools and applications. It will also enable students to acquire the capability to design and develop software systems based on e-technologies and to apply them to some domain applications.

COMP 3160 Computer Vision and Pattern Recognition (3,2,1) (E)

Prerequisite: COMP 1210 Data Structures and Algorithms and MATH 1140 Computational Mathematics

This course gives students a broad knowledge on and techniques used in contemporary research on computer vision and pattern recognition.
