**LANG 1491 English I (3,3,0) (E)**

This course aims to (1) improve students' general English proficiency in speaking, listening, reading and writing in an integrated and holistic manner; and (2) foster appropriate communicative strategies and effective use of English primarily for academic purposes, as well as in professional and social settings. The course adopts a theme-based, integrated approach to achieve the two broad aims. Important contemporary themes are selected to motivate and engage students in thought-provoking and purposeful use of English. The themes also provide a framework for a diversity of multimedia materials, including academic texts, news reports, magazine articles, web articles and videos, TV and radio programmes, etc. Students will have extensive opportunities to read and listen to, as well as discuss and write about, major issues arising from each theme, thereby improving both their language proficiency and their intellectual maturity and cultural knowledge. Training and practice in effective communicative strategies are integrated in teaching and learning activities throughout the course. Students will learn to read and analyse the issues critically and from multiple perspectives to gain a deeper understanding and insight, and present their arguments and points of view convincingly. Generic academic and professional skills (summary writing, graph/table description, discussion strategies, etc.) are distributed and explicitly practised in the course. To encourage independent, lifelong learning, the course provides students with guidance and training in using self-access multimedia resources to improve their English and broaden their horizons.

Training and practice in effective communicative strategies are integrated in teaching and learning activities throughout the course. Students will learn to read and analyse the issues critically and from multiple perspectives to gain a deeper understanding and insight, and to present their arguments and points of view convincingly in class and in writing. Advanced academic and professional skills (synthesizing, debating, panel discussion, etc.) are distributed and explicitly practised in the course.
