

courses that are research-based and aim at exploring further on novelty of time-based media. This course also supports students working on other areas of arts with elements of moving image and sound, such as interactive media, hypermedia and installation art works.

VART 3137 Constructed Reality (3,4,0) (E)

Prerequisite: VART 2135 Looking through the Lens or VART 2136 Sound: The Basics

In the post-medium culture, artists no longer identify themselves as a practitioner in a specific medium, but rather work across multiple mediums to create a rich visual dialogue. Therefore, this course is an attempt to bring together photography and performance art, with the awareness of “the act depicted in the photography”, “the unpremeditated photographic action” as the style of mid-twentieth-century photojournalism and lomography: snapshots, “an act/performance created for a photograph” and “a stand-alone picture to present a pictorial narrative.” Referencing photographers who create images relating to fables, fairy tales, apocryphal events and modern myths—a collective consciousness, this course will further develop creative processes and innovative works that explore the possibilities in an active moment that is not simply captured by a still frame, but will continue beyond the image.

This studio course will launch an interactive dialogue between photography and performance art. Students will explore the different creative processes between these two art mediums, discovering the similarities and differences in each, and utilizing the knowledge gained from both in developing time-based photography. Discussions and presentations will focus on narrative compositions (such as directing an event, specifically for the camera), surveillance, process and documentation as art, and the use of text in photography.

VART 3145 Sculpture: Form and Applications (3,4,0) (E)

Prerequisite: VART 2145 Sculpture: Materials and Processes

Direct carving is a technique that has been utilized since the beginnings of civilization. The course will focus on such subtractive process and/or the use of reductive thinking as a creative tool to explore sculptural forms. Students will investigate how form can be revealed through different carving approaches and techniques.

In this course students will study the use of working models, templates as well as to work directly with the material to experience both systematic and intuitive methods for producing sculptural form. Students will also examine the application aspects of sculptural form in large scale public sculpture / environmental project through scaled models and appropriate visual presentation formats.

VART 3146 Installation Art (3,4,0) (E)

Prerequisite: VART 2145 Sculpture: Materials and Processes

Installation has been the most commonly used art form in contemporary visual creation since 1970s. It is a kind of integrated medium of expression which potentially triggers different sense such as sound, light, odour and other intangible sensible elements. The phenomenon of mixed media and interdisciplinary creation in contemporary art making has indicated strong initiatives to explore new creative space and language within an existing framework, and installation art is the most organic experimental area in this realm. Through the practice of installation art, students will utilise various forms of visual expression within space.

This course aims to expand and extend students' abilities in creativity and expression through practice, exploration and research work on various mixed-forms in the concept of space and place. It will focus on exploring the integrated specificity of installation art, which can integrate other medium such as video, imaging, processing, temporary, performance and theatre, and even interactive installation. It will give a general survey on theory, the development and the latest trends of installation art; students will explore how ideas and theories get contextualized, and how space is redefined with concepts of identification and

site-specific contextual meanings.

Students who have a background in installation art may have great advantages in, and may also be interested in expanding their studies in exhibition design, sculpture, performance art, public art, video art and various kinds of new media subjects that touch on the use of space and time. One of the features of this course will examine how to make use of small living space in Hong Kong in art creation, which will deepen the students' knowledge of the culture of their own living space. Construction workshop will be given to assist their installation production.

VART 3147 Public Art (3,4,0) (E)

Prerequisite: VART 2145 Sculpture: Materials and Processes

Traditionally the concept of public art has mainly been related to monuments and statues in public spaces. Later its form were diversified through various interpretations of the “public”, and as a result not only includes outdoor sculptures and murals to functional works integrated into architecture, but also site-specificity works, community based projects and interactive street performances. Nowadays, a new sense of public art refers to any art that happens and exhibits in a public domain, which may be art in “public places”, art that “creates public spaces”, and art of “public interest”. Public art does not simply refer to already existing physical urban sites such as parks, squares, streets or cities, but actually aims to re-interpret various social and cultural spaces and their functions.

This is a practice-based course, which includes conceptual and practical exercises relating to public art, as well as investigating and exploring new possibilities of art in the public arena. It will provide students with new concepts and approaches to explore art as a public situation. Students will establish public art in their geographical, political and social context, allowing them to integrate art and life within their personal living space and community. Students will further understand the concept of 2D and 3D art work, site-specific work, performances in contextuality and art in daily life, making this course also a valuable experience for students interested in Sculpture, Spatial Design, Installation Art and Performance Art.

VART 3155 Bodily Perception in Artistic Practice (3,4,0) (E)

Prerequisite: VART 2155 Bodyscape

Gaining perceptual experience through our bodily senses (sight, hearing, smell, taste, touch and motion), and making use of it to discern various circumstances in the surroundings is the common ground for human communication. From the perspective of visual arts practice, this course aims to extend students' sensibility and capability in employing perceptual experience as a means of artistic investigations and expressions. It will also open up students' vision and mind to new creative possibilities. The study of bodily perception will be introduced in both practical and theoretical aspects in which relevant reading materials on Body Aesthetics and related art movements in the 20th century will be explored.

With the influences of Dada, Fluxus, Happening, Performance and other related art movements in the 20th century, the phenomenon of artists presenting art with their own bodies has become common. It particularly refers to the exploration of bodily perception and its possible implication in artistic expression. In recent years, this phenomenon extends to a wider scope of artistic practice and is now applied to more diverse creative disciplines such as wearable, spatial, product, multimedia and interface design. The study of bodily perception thus suggests an interdisciplinary platform to integrate various art forms and creative practices.

VART 3156 Embodied Interaction (3,4,0) (E)

Prerequisite: VART 2155 Bodyscape

Contemporary artists have been experimenting with the use of technology to enable and orchestrate the participation of the audience. Studies of interactivity are often focused in the technical implementation rather from the critical and aesthetic viewpoints.
